Garment Size Guide

Our sizes are graded on Italian standards and translated for international reference. If you are between sizes, the fit notes for each garment below will tell you which way to err.

How to Measure

Take measurements over light undergarments, standing relaxed with arms at your sides. Use a soft tape — a metal ruler will read tight against the body. Have someone measure for you if possible; self-measurement at the back and across the shoulders is rarely accurate.

Chest / bust — around the fullest part, tape level under the arms.

Waist — around the natural waistline, the narrowest point of the torso, above the hip bone. Not at the belt line.

Hip — around the fullest part of the seat, roughly 20 cm below the waist.

Inseam — from the crotch seam of a trouser that fits you well, down the inside leg to the hem.

Shoulder — from the outer edge of one shoulder to the other, measured across the back.

Sleeve — from the shoulder seam, along the outside of the arm, to the wrist bone.

M	94–98	80–84
L	98–102	84–88
XL	102–106	88–92

Turtleneck Sweater

Cashmere knit · close-fit silhouette

The Turtleneck is cut to sit close to the body without constriction. The line reads fitted through the torso, with a slightly high-set armhole and a sleeve that tapers cleanly to the wrist. The wrap-up collar and V-neckline are structural to the design; the piece is not meant to be worn loose.

If you are between sizes: take the smaller. Cashmere relaxes with wear and will settle into the body over the first few uses.

Unisex T-Shirt

Premium Pima cotton jersey · regular fit

The T-Shirt is cut unisex with a regular fit — neither slim nor oversized. The silhouette is clean through the body, with a conventional shoulder point and a set-in sleeve that ends just past the shoulder bone. The length sits at the hip, breaking fractionally at the waistband of a trouser.

If you are between sizes: take your usual. The Pima has no stretch beyond what the fiber naturally provides, and the regular fit accommodates a half-size on either side without distortion.

For women: your usual women's size will translate directly. For a closer fit through the torso, size down one.

Nuvé Coat

Wool twill · convertible hooded silhouette · relaxed-through-body fit

The Nuvé is cut with a deliberately relaxed line through the torso — enough room to carry the weight of the 450 gsm wool twill without pulling at the shoulder, and enough ease to transition between the hooded coat and cloak forms without strain. The fit is intended to accommodate a mid-winter layering stack underneath: a shirt and a knit.

If you are between sizes: take your usual. If you expect to wear the coat over tailored jackets or heavier knitwear, size up.

Wool Trousers

Wool gabardine · pleated tailored silhouette · mid-rise

The Wool Trouser follows the classic pleated tailored tradition: a mid-rise waistband, a single forward-facing pleat that releases into a clean line through the thigh, and a tapered break just above the shoe. The pleat is structural — it is where the ease in the upper leg lives. The trouser is not intended to read slim through the thigh, and should not be sized down to produce that effect.

If you are between sizes: take the larger at the waist. A trouser that binds at the waist will never sit correctly, regardless of how the rest of the leg measures. If the waist is slightly generous once the larger size arrives, a tailor can reduce the seat seam without affecting the line of the pleat.

A Note on Italian Sizing

Italian ready-to-wear is graded slightly trimmer than American or British ready-to-wear, particularly through the shoulder and sleeve. If you are used to US sizing, you may find our equivalent IT size closer to your expectations than the numeric conversion suggests.

When in doubt, measure a garment already in your wardrobe — one that fits you as you wish ours to — and match those flat measurements against the chart. The number on a label has always mattered less than the line on the body.
